

IMPROVE YOUR PRODUCTIVITY

■ 360° revolving gate, 6 rail including gate.

■ Calf crush.

PRODUCT SPECIFICATIONS

STEER can make panels and yard components from a number of different materials. Standard material is a 5 or 6 rail, galvanised pipe with 50NB, 65NB or 80NB posts. Other options include 40 x 40mm GAL or black RHS, 50 x 50mm RHS, combined steel and timber, steel posts with cleats for all timber rails.

WE ALSO OFFER

- Roofed crush and race areas
- Race weighing platforms
- Cattle tilting tables
- Curved race panels

Steer also have modular design yard components of 2.1mt for total flexibility of design.

Steer have an extensive range of cattle yard designs which are too numerous to list here.

Please contact our office for further details and plans or arrange for an on-site consultation.

Specifications subject to change without notice.

■ Remote control components.

STEER CATTLE YARDS
GATES ARE ALL PRE-HINGED AT THE FACTORY AS SHOWN BELOW

Fully welded hinged gates at the factory To give unlimited years of hard work.

Gate rails fully notched and dovetailed for maximum strength. Heavy duty hinges same diameter of pipe braced with fully welded gusset so as to prevent any sagging.

Lift off retaining bolt into all appropriate positions in yards.

We do not recommend bolt on strap type hinges as they will push out of vertical and allow the gate to sag.

STEER

KNOW HOW

PERMANENT AND RELOCATABLE CATTLE YARDS

STEER have one of the largest range of cattle yards on the Australian market with designs covering from the smallest herd owner through to large feedlot systems. We are also able to quote on your design.

In cattle yard manufacture nobody makes better!

All welds in panel rails are notched and dove tailed for maximum strength.

No light hinges on gates that get such hard work.

Yards are built to last and carry a three year maintenance/service warranty.

We offer yards of all capacities. Designs are side loading, dual loading curved yards with centre drafting, rectangular yards with pound drafting and many more styles for rapid stock handling. Supplying Australian and overseas farmers with our products since 1957 is a record to be proud of. For more details contact our office.

- Heavy gauge fully galvanised steel construction.
- Fully bolted panels for extra strength.
- Reinforcing straps in centre of fence panels.
- Notched and dovetailed pipe joints.
- Heavy duty gate hinges with fully welded gussets.

EFFICIENT CATTLE EQUIPMENT THAT REALLY WORKS

Today STEER Engineering is a world leader in the design and manufacture of cattle handling equipment.

Steer have provided cattle handling products that are tried by farmers and proven over many years that they work.

STEER QUALITY

The STEER product range stands for quality. Built for a lifetime of service even under adverse conditions.

This is commitment evident throughout the entire steer product range.

BASIC YARD COMPONENTS

■ 6 rail plate and plate panel

■ 5 or 6 rail flag panel

■ 5 roll post and post panel

■ 5 roll sheep proof

■ 6 rail gate in frame

■ 5 rail pre-hinged gate for timber posts

ESSENTIAL RACE COMPONENTS

■ Sliding gate - slides both ways

■ 6 rail race gate in frame

■ Race hoops

■ Sheeted adjustable race sides. Heavy duty.

■ Cattlemaster bailhead

■ Heavy duty bailgate

On the front cover: Yard comprised of various STEER components. Adjustable loading ramp. Cattlemaster crush.
